

Screws coted with permatex sealer

Gasket

View 1

View 1 used in tanks with narrow bottoms or in confined spaces. Rod end bent 90°, clip to hold float to the end of the rod.

View 2

View 2 used in tanks with wide bottoms. Rod end bent 90° long enough to hold float, clip to hold float from coming off the end.

When using float as in View 1 start clip at top end before assembling rod, rounded edge toward float

Clip (rounded edge showing)

1. Hole pattern is not symmetrical, make certain holes align in proper direction.
2. Keep float approximately 3/4" from bottom of tank.

Clip (rounded edge toward float)

Rod end bent 90°
